DETAILED ACTION

Drawings

1. The drawings were received on March 5, 2004. These drawings are approved.

Specification

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 22, 25-33, 36, 40-42, and 44-46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The description of the "unit curve" (p. 7) does not clearly explain how this curve is derived nor are any working examples given. The statement that the 'unit curve' is empirically derived does not help since there is no clear direction from the inventor of how the experimental run is to be carried out, or under what conditions, to obtain the necessary values, nor how the data is compiled into the curve. There is no clear explanation of what the "significant parameter" is that has to be

entered into control unit 40, or what algorithm the control unit uses to calculate the unit curve. There is no algorithm given for the computer to calculate the "theoretical weight curve" via the "unit curve", or even what is meant by the circular claim limitation that the "theoretical weight curve is derived ... from the unit curve relative to the theoretical curve", nor are there any working examples given of how it is done. See *MPEP* § 2164.01.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 22, 25-33, 36, 40-42, and 44-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "unit curve" is not defined in the claims. Furthermore, the claimed limitation that "said theoretical weight curve is derived ... from the unit curve relative to the theoretical curve" is circular logic and is therefore unclear.

Conclusion

5. Claims 34, 35, 37, 38, 39, and 43 are allowable over the art of record.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See *MPEP*

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

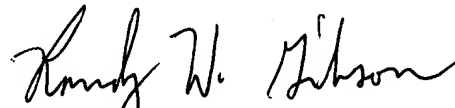

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
